A. Recommendations

THAT Council receive Staff Report PDS.18.64, entitled “Wakeboard and Waterski Cable Park – Information Report” for information purposes.

B. Overview

The purpose of this report is to provide information to Council on a proposal to amend the Official Plan and Zoning By-law and to develop the former Cedar Run Horse Park lands for a wakeboard and waterski cable park facility.

C. Background

Planning Services has received applications to effect the development of the subject lands as a wakeboard and waterski cable park facility. The submission includes an application to amend the Official Plan and Zoning By-law and an application for site plan approval.

The proposed facility consists of recreational commercial uses primarily focused on the use of the property for a wakeboard and waterski cable park. As a part of the development, the applicant is proposing to construct two (2) ponds on the property which will be used for wakeboarding and waterskiing. Each pond will be outfitted with a system of cables and pulleys to tow participants, negating the need for a boat or personal watercraft. The proposal also includes a pro shop, passive recreational uses, surface and overflow parking areas, and a commercial plaza and overnight accommodations as part of a future phase of development.

The submitted Official Plan Amendment application proposes to amend the existing site specific land use permissions relating to the former Cedar Run Horse Park in order to provide for the proposed Waterski and Wakeboard Cable Park and accessory buildings/uses as permitted uses on the lands. The amendment does not seek any changes to the primary Urban Employment Area or Hazard designations currently applied to the property.
The submitted Zoning By-law Amendment application has the effect of adding a ‘Waterski Wakeboard Cable Park’ as a permitted use to the C4-12-h zone category. The proposed amendment will also remove a ‘Horse Park’ as a permitted use and will include appropriate implementing provisions.

Location

The subject lands are located at the south-west corner of the intersection of Grey Road 2 and Clark Street in the historic Village of Clarksburg. The lands are approximately 35.6ha (88ac.) in area and were previously utilized for the Cedar Run Horse Park. The lands are also subject to an industrial plan of subdivision, registered on title in November of 1981, which established the existing lot fabric and dedicated municipal right of ways internal to the site. The lands are also within the study area for the previously completed Environmental Assessment pertaining to intersection upgrades at Grey Road 2 and Highway 26. As a part of the future intersection upgrades, the completed EA also identified the need to re-align Clark Street through the subject lands, in an identified corridor immediately south of the existing OPP and Fire Stations. The applicant and the Municipal Infrastructure and Public Works Department are currently in discussions to determine an agreeable solution for addressing the existing municipal right of ways on the property and the future Clark Street corridor, potentially through a future land swap. A future report will be brought forward to provide information regarding these discussions and any resulting recommendations.

Current Planning Status

Planning and Development Services has deemed the Official Plan Amendment and Zoning By-law Amendment applications complete, as per Section 22(6.1) and Section 34(10.4) of the Ontario Planning Act, R.S.O. 1990, C.P.13. As such, the applications are now active and will undergo the standard development review process. Information submitted in support of the applications include:

- Architectural Context Plan;
- Architectural Elevations;
The proposal remains in the initial stages of the review process. At this point in time, the submission materials are under the review of municipal staff and commenting agencies in order to identify any initial concerns with the applications. A public meeting will be scheduled at such a time that this initial review stage is completed and an agreeable solution for addressing the existing municipal road allowances has been determined.

Two public meetings will be held for this proposal. The first public meeting will be hosted by the applicant and will be in an informal public open house format, wherein members of the public can obtain information about the proposal and ask questions of the applicant and their consultants. The second meeting will constitute the statutory public meeting wherein formal public comments will be obtained. A date for these meetings has not yet been determined, however Notice of Public Open House/Meeting will be provided in accordance with the Ontario Planning Act once an appropriate date has been determined.

D. The Blue Mountains Strategic Plan

Goal #1: Create Opportunities for Sustainability
Objective #2 Attract New Business
Objective #3 Promote a Diversified Economy

Goal #2: Engage Our Communities & Partners
Objective #1 Improve External Communication with our Constituents

Goal #3: Support Healthy Lifestyles
Objective #1 Promote the Town as a Healthy Community
E. Environmental Impacts

The application is currently under the review of internal departments and commenting public agencies.

F. Financial Impact

The application is currently under the review of internal departments and commenting public agencies.

G. In consultation with

Michael Benner, Director, Planning and Development Services.
