Subject: RE: Delphi Waterfront - September 24, 2018 Meeting

I wish to address counsel at the meeting in the evening of September 24.

Attached please find my deputation form. Please include the following statement in the Agenda:

My family and I are resident in Peaks Bay. I had previously spoken at a meeting at the Municipal offices on June 4.

At that meeting I voiced my opposition to a fence being erected on public lands to block waterfront use.

At the conclusion of the meeting and subsequent meetings held in counsel, it was my impression that signs would be erected rather than a fence which would warn the public to take care and protect the ANSI which are fossils permeating the area. This was seen as an inexpensive and effective solution.

Instead, the Town has effectively blocked all safe passage to the west of the pathway leading to the water. Fencing and extensive landscaping has been done in the area since the June 4 meeting. A significantly large amount of immovable boulders have been deposited by machinery as well as trees, shrubs and brush. I fail to see how this has benefitted the ANSI.

The Town had previously been provided with confirmation from the Ministry of Natural Resources that they do not consider public beach access to be damaging to the ANSI.

I have now been made aware that all reference to 'PUBLIC ACCESS' on the path to the waterfront on Ellis Drive have been removed from the documentation for the Peaks Bay. This is in stark contrast to how the area was designated at the time of my home purchase.

It is unfair to deny area residents in this community access to Georgian Bay. It is unfair to use our tax moneys to limit the public's access to the area's natural resources.

I ask for the removal of all boulders, fencing and landscaping. I ask that the area be returned to its natural state.

Regards,  
James V. Leone
